Alican Korkmaz

Senior Android Developer | Senior Native Mobile Application
Engineer | #AndroidDeveloper
İstanbul, İstanbul, Türkiye

Özet

Passionate. Clean coder. Lifelong learner.

I've 6+ years of experience in Android field and mobile application development in general. I highly value constant eager to grow, knowledge sharing, and clear communication skills.

Deneyim

adesso Turkey
3 yıl

Senior Mobile Application Developer
Şubat 2022 - Present (11 ay)
İstanbul

As an adesso,

- Currently providing mobile app development consultancy for EnBW (Germany). Working on Mobility+ : a navigation app of POIs like EV charging stations. I am focused on Android Auto development, Jetpack Compose and MVI architecture.

- Provided mobile app development consultancy for Papara (Türkiye). Developed Papara Merchant app. Established solid base by making architectural decisions and enabled further development for teammates.

- Provided mobile app development consultancy for Cornelsen Verlag (Germany). Developed UnterrichtsManager app.

- Provided mobile app development consultancy for multiple teams at Allianz (Türkiye) for more than 2 years. Completed long running internal projects successfully. Made significant impact on codebase by transforming it from %100 Java to %100 Kotlin, introducing modern practices like DI, MVVM, MVI, coroutines & flows.

Mobile Application Developer
Ocak 2020 - Şubat 2022 (2 yıl 2 ay)
İstanbul, Turkey

As an adessi,

- Provided mobile app development consultancy for multiple teams at Allianz (Türkiye) for more than 2 years. Completed long running internal projects successfully. Made significant impact on codebase by transforming it from %100 Java to %100 Kotlin, introducing modern practices like DI, MVVM, MVI, coroutines & flows.

- Provided mobile app development consultancy for BKW (Switzerland). Developed Home Energy app.

Jangle
Android Engineer
Mayıs 2018 - Aralık 2019 (1 yıl 8 ay)
Levent, İstanbul

For a social media app called Jangle, I played crucial role and was responsible for all parts of the app; from building the application backbone to publishing it on Play Store. By using Kotlin beside Java, mastering Architecture Components & UI Components, I had desire to code clean and be always up-to-date.

MK Teknoloji
Software Development Engineer
Ekim 2017 - Ocak 2018 (4 ay)
İstanbul, Turkey

I played fullstack role at .Net MVC and Android projects from frontend & backend & database, to SEO. I used Java, C#, Javascript, JQuery, Bootstrap, CSS, Sass, xHTML, MSSQL, Firebase. I also converted a .psd file to fully working website.

Huawei Technologies
7 ay
